Subject: Draft Hot Site Report

OSC Lindsey reports that the fire watch period continues through tomorrow, Tuesday October 31. There have been no flare ups reported since the fire watch began yesterday. The Unified Command met with the building owner to discuss next steps. WVDEP issued an Order to the property owner last week to come into compliance with its NPDES permit, provide a detailed inventory of the materials that had burned and detailed inventories from all other sites in West Virginia. The property owner has agreed to do the work as required by WVDEP and have a fence placed around the Site as soon as the fire watch is over.

EPA is continuing 24-hour air monitoring activities through Tuesday, October 31. EPA's particulate monitoring data has been placed on the EPA's website as well as the ASPECT report.

Wood County reported that their air monitoring consultant, CTEH, has demobed from the Site. OSC Lindsey will work with the Public Health agencies to coordinate review of remaining data and public health messaging.
